DATA MANAGEMENT

For a Leading Operations Digitization Company

CASE STUDY

2021

THE MARKET FOR SUPPLY CHAIN OPTIMIZATION IDEATES TO CREATE TRANSPARENCY, AND ECONOMIC FEASIBILITY, WITH PROCESS OPTIMIZATION, IMPROVED EFFICIENCY AND GROWTH.

CLIENTS

Our client is a leading name in the supply chain industry known for offering systematic, knowledge-based optimization of purchase and, maintenance along with supply chain operations.

SCENARIO

For **scaling their operation**, our client wanted a partner that could accomplish **high-quality annotation in a small amount of time**.

SOLUTION

Borek Solutions has **formed a digitalization team** that comprises of web research experts known for collecting relevant data within the given time and storing it in a transparent manner.

TEAM

In order for the team to be as agile as possible, we created a multi-layered structure. The **project manager** focuses on the actions of the team and the **Subject Matter Expert (SME)**, has an eye on the work and maintains the of work within the team. The Workforce itself was tasked with the time-intensive labor of data entry and maintenance.

IMPLEMENTATION

Requirement understanding phase

- The client presents a **sample data** based on the project requirements along with project instructions.
- An internal check is done to ensure clarification and understanding of the project.

Clearly defined process and workflow

- Once the queries are resolved Borek's team **creates a data sample** and prepares requirement understanding documents.
- After receiving green signal from the client for the samples shared with them, Borek's team kick started the project.
- **Hourly and daily tracking** of each member's progress ensured on time delivery of the project.

HIGHLIGHTS

- 01 **Invoice data entry**
- 02 **Research** and enrichment of contact details
- 03 **Data entry** from web links
- 04 **Organization of the new found and pre-existent data** commenced in excel.
- 05 Over three years, **the team grew from 2 to 10 resources**
